Equipments

Not compatible

LiveIn2 is a connected solution providing local and remote control of compatible equipment of the building (roller shutters, blinds, garage doors etc.) from a smartphone or touch tablet.

Regarding the SIMU-Hz equipment without feedback information : in view of the possibility of controlling such equipment remotely and out of the User's sight, SIMU forbids the use of LiveIn solution with the sequential command equipments listed below that is to say the equipments that don't give the possibility to the User to know what command was sent.

RSA Hz receiver box

Standard receiver SA Hz

Precautions when using LiveIn with some equipments

Warning: Some power operating systems do not include intrinsic obstacle detection devices, and generate large forces that can lead to injury or damage to property.

In order to keep users safe, obstacle detection devices must be installed, such as sensitive feeling edges, photoelectric cells or any other safety device, on all the areas of gates, garage doors or roller shutters presenting a risk of trapping or cutting.

These mandatory regulatory requirements may vary depending on the country of installation.

SIMU asks the installer, a professional in home motorisation and automation, to refer to the specific instructions for the equipment installed and to the applicable standards. Contact SIMU for further information, or in case of doubt.

In compliance with standard EN 12453 on safety in use of power operated doors and gates, use of the LiveIn2 unit to control an automated garage door or gate system not visible to the user, it is obligatory for a photo-electric cell type security device to be installed on this automated system.

The installer acknowledges being aware of these instructions and have taken steps to ensure compliance with them in installing and using the products. The installer must train the user in the correct use of this equipment and alert the user to the risks inherent to operating this equipment remotely. SIMU shall not be liable for any damage if the User fails to comply with these instructions.
